Slitrk6 (CT) antibody (pAb)
Rabbit Anti-Human/Mouse/Rat Slitrk6 (CT)

Instruction Manual

Catalog Number: PK-AB718-4479

Synonyms: Slitrk6 Antibody; SLIT and NTRK-like family 6

Description: SLIT and NTRK-like family 6 (Slitrk6) is a member of a protein family consisting of six homologous transmembrane proteins (Slitrk1-6) that share two conserved leucine-rich repeat domains in the extracellular domain and have significant homology to Slit, a secreted axonal growth-controlling protein. These proteins are also homologous to trk neurotrophin receptors in their intracellular domains. Expression of Slitrk proteins is highly restricted to neural and brain tumor tissues, but varies within the protein family. Slitrk6 expression has been observed in tissues such as tongue, lung, gastrointestinal tract, and pancreas. Like every other Slitrk protein except Slitrk1, overexpression of Slitrk6 inhibited neurite outgrowth in cultured neurons, suggesting that these proteins are involved in the control of neurite outgrowth. At least two isoforms of Slitrk6 are known to exist. This antibody is predicted to have no cross-reactivity to other Slitrk proteins.

Quantity: 100 µg

Source / Host: Rabbit

Immunogen: Slitrk6 antibody was raised in rabbits against a 16 amino acid peptide from near the carboxy terminus of human Slitrk6.

Purification Method: Affinity chromatography purified via peptide column.

Clone / IgG Subtype: Polyclonal antibody

Species Reactivity: Human, Mouse, Rat

Specificity: This antibody is predicted to have no cross-reactivity to other Slitrk proteins.

Formulation: Antibody is supplied in PBS containing 0.02% sodium azide.

Reconstitution: During shipment, small volumes of antibody will occasionally become entrapped in the seal of the product vial. For products with volumes of 200 µl or less, we recommend gently tapping the vial on a hard surface or briefly centrifuging the vial in a tabletop centrifuge to dislodge any liquid in the container’s cap.

Storage & Stability: Antibody can be stored at 4°C for three months and at -720°C for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

Applications: E, WB, IHC, IF     |Note: Antibody might be suitable for other applications not tested so far. Optimal concentrations for each application have to be determined individually.

Slitrk6 antibody can be used for detection of Slitrk6 by Western blot at 0.5 - 1 µg/mL. Antibody can also be used for immunohistochemistry starting at 2.5 µg/mL. For immunofluorescence start at 20 µg/mL.
